MAP OF THE STATE SHOWING DIAGNOSTIC COVERAGE

**35%**

**DIAGNOSTIC COVERAGE**

**50%**

**DOTS COVERAGE**

**0%**

**FINANCE / FUNDING**

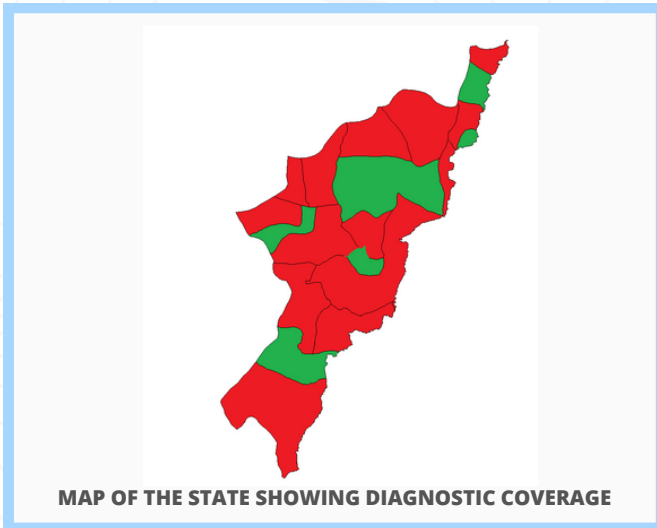

## KEY ASKS

1. Ensure that each Local Government Area has at least one molecular TB testing machine and provide support for their regular maintenance.
2. Assess public health facilities that do not offer TB services and upgrade them. Develop a Workplan and allocate resources to gradually expand TB services in all public health facilities.
3. Conduct needs assessment of TB programs and services in the State and develop costed State TB Strategic Plan and Resource Mobilization Plan.
4. Allocate sufficient funds for TB services in the State Annual Budget and ensure timely release. Collaborate with the private sector to mobilize additional resources for TB and establish mechanisms for effective utilization, monitoring, and accountability of all resources.
5. Strengthen the human resource capacity of the State TB Program. Recruit more personnel and reduce high turnover of trained TB service providers.

## NOTES

- Information in this Scorecard are as at September 2023.
- Diagnostic Coverage is the percentage of Local Government Areas in the State having at least one (1) molecular TB testing machine.
- DOTS Coverage is the number of health facilities in the state offering TB treatment services out of the total health facilities in the state.
- Finance is the funding by the State Government for TB programs and services through Budget Release or other funding mechanism.

2. Assess public health facilities that do not offer TB services and upgrade them. Develop a Workplan and allocate resources to gradually expand TB services in all public health facilities.
3. Conduct needs assessment of TB programs and services in the State and develop costed State TB Strategic Plan and Resource Mobilization Plan.
4. Allocate sufficient funds for TB services in the State Annual Budget and ensure timely release. Collaborate with the private sector to mobilize additional resources for TB and establish mechanisms for effective utilization, monitoring, and accountability of all resources.
5. Strengthen the human resource capacity of the State TB Program. Recruit more personnel and reduce high turnover of trained TB service providers.

## FINANCE / FUNDING

### NOTES

- Information in this Scorecard are as at September 2023.
- Diagnostic Coverage is the percentage of Local Government Areas in the State having at least one (1) molecular TB testing machine.
- DOTS Coverage is the number of health facilities in the state offering TB treatment services out of the total health facilities in the state.
- Finance is the funding by the State Government for TB programs and services through Budget Release or other funding mechanism.

# NIGER STATE TB SCORECARD

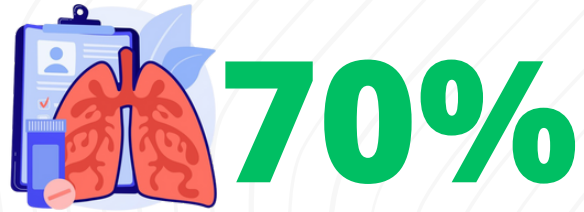

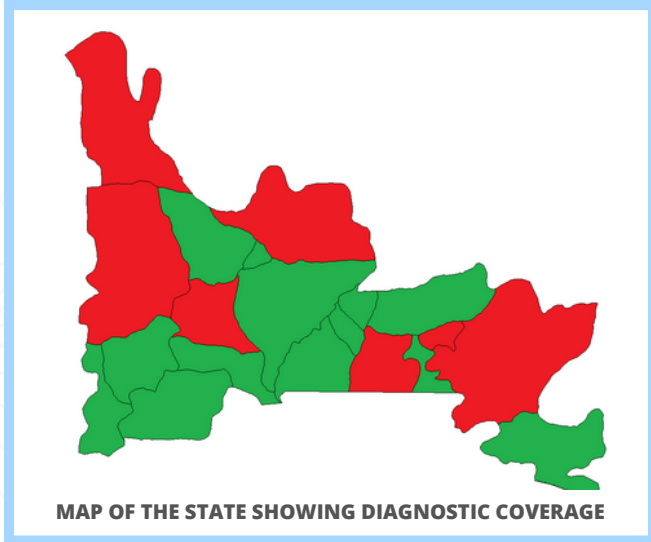

**KEY ASKS**

1. Ensure that each Local Government Area has at least one molecular TB testing machine and provide support for their regular maintenance.
2. Assess public health facilities that do not offer TB services and upgrade them. Develop a Workplan and allocate resources to gradually expand TB services in all public health facilities.
3. Conduct needs assessment of TB programs and services in the State and develop costed State TB Strategic Plan and Resource Mobilization Plan.
4. Allocate sufficient funds for TB services in the State Annual Budget and ensure timely release. Collaborate with the private sector to mobilize additional resources for TB and establish mechanisms for effective utilization, monitoring, and accountability of all resources.
5. Strengthen the human resource capacity of the State TB Program. Recruit more personnel and reduce high turnover of trained TB service providers.
